

Available in 2 Oz vertical micro mist spray bottle for nasal and oral use

What is O-Spray?

It is a redox modulator nasal and oral spray with a proprietary formulation of electrolyte salts hydrolyzed in ultrapure water.

The components in O-Spray have a high affinity to the human body's natural electrolyte composition. Its manufacturing process gives a modern spin to the homeopathic dilutions approach. All elements are present in parts per million and parts per billion, and their properties are retained as nanoparticles

The ultrapure water solvent is a commonly used term in the semiconductor industry to emphasize the fact that the water is treated to the highest levels of purity for all contaminant types. It is a pharmaceutical grade water with no interference at the molecular level on the performance of the final product. Being O-Spray an energy-based technology, this is of utmost importance. The ORP of ultrapure water exceeds US, WHO and European standards.

All ingredients in O-Spray are natural, certified organic and sourced in USA. They are listed as GRAS and considered trace nutrients by the FDA.

How does it work?

The chemical profile of O-Spray mimics biological water and the redox equilibrium in mucous membranes and extracellular body fluids. It is in perpetual generation of reactive oxygen species. This constant oxidation-reduction cycle is carried on to all environments that can support ionic diffusion. Biologically, O-Spray can propagate easily throughout the body because we are about 70% water. The solution retains redox activity as an aerosol. By maintaining the redox equilibrium in the body fluids that host the source of energy of metabolic systems, the use of O-Spray supports the immune system and promotes healing from within by improving our own body's capability of inactivating allergens, fight infection and replenish redox deficit at the cellular level.

KEEP O-SPRAY ON HAND TO DISABLE ALLERGENS AND PROTECT FROM INVADING AIRBORNE AGENTS

By applying O-Spray in the nose it will:

- Act as a barrier against all airborne agents
- Neutralize allergens and airborne contaminants
- Relief dryness in nasal passages
- Inactivate virus, eliminate bacteria and fungi
- Lessen the effect of existing viral attack
- Clear sinus, reduce inflammation
- Help improve infectious respiratory conditions
- Help reduce microbial colonies on nose, sinuses, and respiratory passages
- Strengthen the immune system and support improvement of infectious respiratory conditions.
- Penetrate the mucous membranes

TRANSDERMAL OXYGENATION, A GAME CHANGER!

- **Fast acting, non-habit forming.**
- **Safe enough for all ages**

By applying O-Spray in the mouth it will:

- Promote redox equilibrium
- Reduce microbial colonization
- Improve mouth health
- Improve gum's health
- Soothe itchy, sore throat
- Reduce throat inflammation

*Help our business grow by sharing your testimonial online!
Customer's feedback is always very much appreciated!!!*
